

MONAVIE ACTIVE AND MONAVIE ACTIVE GEL

PRODUCT INFORMATION PAGE

MonaVie Active is a delicious blend of the Brazilian açai berry—one of nature’s top superfoods—and 18 other body-beneficial fruits, assembled in an advanced formula that contains glucosamine to promote healthy joint function. Additionally, MonaVie Active Gel allows you to enjoy all the benefits of MonaVie Active juice in a convenient gel pack. Whichever MonaVie Active product you treat your taste buds to, you’ll feel great knowing that you are taking charge of your health.

BENEFITS

- Offers a blend of 19 fruits, including the superfood açai.
- Provides antioxidants and phytonutrients to help maintain and promote good health.
- Delivers the equivalent antioxidant capacity of approximately 13 servings of fruits and vegetables (in 4 oz. of MonaVie).
- Contains glucosamine to help promote joint mobility, health, and function.

KEY INGREDIENT

The açai berry is the crown jewel of the MonaVie Active blend. When properly freeze-dried, açai boasts an ORAC score higher than that of any other fruit or vegetable tested to date, based on available USDA data. It’s no wonder that for ages the indigenous cultures of the Amazon have revered açai as a source of health and vitality. Recently, modern science has validated the remarkable health benefits of this fruit, and studies have shown açai to contain the following beneficial nutrients:

- Antioxidants
- Phytonutrients
- Amino acids
- Vitamins
- Trace minerals

Studies have also shown that freeze-dried açai powder boasts antioxidant capacity more than 15 times higher than blueberries and more than 20 times higher than raspberries. The final MonaVie Active blend incorporates the flavors and benefits of the açai berry and other healthful and delicious fruits.

WHAT MAKES MONAVIE ACTIVE UNIQUE?

- **THE KEY INGREDIENT.** MonaVie Active’s açai leverages an exclusive method of preserving the benefits of the açai berry into a freeze-dried powder. Rich in polyphenols (a powerful form of antioxidants), açai is able to neutralize free radicals, thereby lowering oxidative stress. What’s important to note is that the açai berry’s nutritional properties are volatile and can easily be compromised if not properly harvested and processed. The process used to make MonaVie Active’s açai freeze-dried powder is the most effective method of ensuring the nutrient content and antioxidant activity of the açai berry

- **THE BLEND.** The açai berry is arguably the most important fruit in existence for your health. Experts have referred to açai as the world’s No. 1 superfood. But nature has given us literally thousands of different phytonutrients and antioxidants that are important for our bodies to function optimally. While it may be difficult to get too much of a good thing, it would be unwise to ignore the variety of health benefits that nature’s other fruits have to offer. This is why MonaVie Active products include a blend of beneficial fruits from around the world. Together, their synergistic effect reaches far beyond what any single fruit could accomplish. MonaVie believes in the philosophy of Balance–Variety–Moderation: balance is better than relying upon the contribution of a single ingredient; variety can produce greater benefits than one particular nutrient; and moderation is more powerful than excess.
- **THE PROCESS.** MonaVie takes great care at each step in production to ensure the highest quality standards are met.

(Harvesting) The process begins with the harvesting of the açai berry deep within the Amazon River basin. Unlike poachers, who illegally chop down an entire tree just to harvest a 12-inch section of the tree known as the palmito (or “heart of the palm”), our conservative harvesting method removes only the açai berries, thereby preserving the life of the tree and promoting the preservation of the Amazon Rainforest.

(Processing) Açai is a powerful yet delicate fruit, and much of its vitamin and nutrient content can be lost within 24 hours after harvesting, if not properly cared for. To preserve its full complement of nutrients, our açai is frozen soon after harvesting. This frozen açai is then processed into our unique freeze-dried formula, the most effective and nutrient-dense form of açai available.

(Formulation and bottling) Most companies use a process known as kettle pasteurization. This process involves heating the formula for several hours and can inadvertently “cook out” many of the nutritional properties. However, MonaVie uses flash pasteurization in which the formula is rapidly heated, bottled, and cooled, thereby capturing the fresh flavors, vibrant colors, and beneficial properties of the blend.
- **THE SCIENCE.** Each step of this advanced and unique process takes place under the watchful eyes of our industry leading product development team and scientific advisors.

WHO SHOULD USE THIS PRODUCT?

- MonaVie Active—Men and women who want to maintain an active lifestyle and supplement their daily diets with beneficial antioxidants and a variety of nutritious, pigmented fruits.
- MonaVie Active Gel—Men and women on-the-go, who want all the benefits of MonaVie Active juice in a convenient gel pack.

DID YOU KNOW?

- Every batch of each fruit in the MonaVie Active blend is tested before shipping to, and after arriving in, the United States to guarantee quality and freshness.

FREQUENTLY ASKED QUESTIONS

WHAT IS AÇAÍ?

Açaí is a small, round, dark-purple berry with amazing nutritional properties. Its appearance is similar to that of a grape, but it has a smaller amount of pulp and a single large seed. Scientific experts have referred to the açaí berry as the most nutritious and powerful food in the world.

DOES AÇAÍ HAVE A HIGH ORAC SCORE?

Yes, MonaVie Active's freeze-dried powder boasts the highest ORAC score of any fruit or vegetable tested to date, on a gram-for-gram basis. The açaí berry is the star among other well-known antioxidant fruits, such as blueberries, grapes, cranberries, and pomegranates. Obtaining a variety of antioxidants through diet or supplementation is essential to maintaining good health.

WHAT DOES ORAC MEAN?

ORAC (oxygen radical absorption capacity) is a way to measure the antioxidant capacity of a food. Foods with high ORAC values are desirable for their ability to inhibit free radical activity.

WHAT ARE PHYTONUTRIENTS?

Phytonutrients are powerful antioxidants and naturally occurring compounds that contribute to the flavor, color, and disease-resistance of plants (i.e., fruits, vegetables, whole grains, and legumes). Maximum health benefits are derived from consuming a variety of phytonutrients with a full spectrum of colors and pigments, such as those found in MonaVie Active products.

WHAT ARE POLYPHENOLS?

Polyphenols are a class of powerful antioxidants that are thought to be responsible for the French Paradox: the French have a diet relatively high in fat, yet have a decreased incidence of heart disease; this is attributed to the amount of polyphenols present in the grapes used to make French wines. MonaVie Active products contain a powerful variety of polyphenols, including anthocyanins.

WHAT IS GLUCOSAMINE HYDROCHLORIDE?

Glucosamine hydrochloride is a natural compound found in the body that is used to help make and form cartilage. Glucosamine has also been shown to help lubricate, cushion, protect, and rebuild joints.

ARE MONAVIE ACTIVE PRODUCTS SAFE?

Yes. MonaVie Active contains fruit juices and purees naturally found in the food supply that have been consumed by various cultures for hundreds of years. However, if you have any health concerns, consult a physician before starting any new product or program.

WHAT IS THE SHELF LIFE OF MONAVIE ACTIVE JUICE AND GEL?

If unopened, MonaVie Active and MonaVie Active Gel have a shelf life of one year. If MonaVie Active juice has been opened, then the shelf life is approximately 30–60 days, as long as the opened bottle is refrigerated. MonaVie Active Gel should be consumed in its entirety as soon as it is opened.
